

Faculty Position - Landscape Biogeochemistry / Multi-scale Biogeochemical Modeling

The Soil and Water Science Department, University of Florida, invites applications for a tenure-track faculty position in research on biogeochemical cycles coupled to hydrology and climate change across terrestrial and aquatic ecosystems influenced by anthropogenic and natural stressors. The appointment is at the rank of Assistant Professor. Research emphasis should be placed on integrating field-scale biogeochemical processes and stressors into larger scale landscape (and/or global) models to allow scenario assessment across various ecosystem in subtropical landscapes, such as Florida. The successful candidate will engage in scholarly activities related to instruction, including teaching undergraduate and/or graduate courses in on-campus and distance education modes and advising of students. Salary will be negotiable and commensurate with experience. Full job description can be found at:

<http://soils.ifas.ufl.edu/>

Applicant should hold a Ph.D., at the time of application in Soil and Water Sciences or Geosciences or Environmental Sciences or a closely related field. Submit an application online at <https://jobs.ufl.edu> (Requisition # 0803591) and provide a letter of application, curriculum vitae, and official transcripts showing receipt of the doctoral degree. Four letters of recommendation should be sent to Dr. Sabine Grunwald, Chair Search and Screen Committee, University of Florida, Soil and Water Science Department, 2169 McCarty Hall, P. O. Box. 110290, University of Florida, Gainesville, FL 32611 (352-392-1951 x204; sabgru@ufl.edu). This position is available until **March 30, 2010**, and will be filled as soon thereafter as an acceptable applicant is available. The University of Florida is an equal opportunity and equal access employer. Women, minorities and members of other under-represented groups are encouraged to apply.
